Coronación piscina

Con el mismo material del pavimento (playa) realizamos acabados como peldaños, bisel, romo para evitar los cantos y lograr así una piscina completamente integrada.

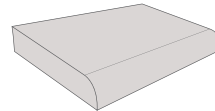

With the same material of the pavement (beach) we realize finishes as steps, bevel, blunt to avoid the edges and to obtain this way a completely integrated swimming pool.

Coronación desbordante piscina

Fabricamos rejillas para recoger el agua que se “desborda” por todo el perímetro de la piscina.

We manufacture grids to collect the water that “overflows” around the perimeter of the pool.

Servicio de tratamiento antideslizante, previo ensayo. / Anti-slip treatment service, previous test.
